

Stainless Steel Door Sills / Options and Products

Standard Door Sills with ABS (anti rubbing) frame "Camry"

Integrated Door Sills (Camry/Corolla sample)

Standard Door Sills (Tundra sample)

Standard and integrated door sills will be available for Toyota vehicles and other brands. The std. sills all come with an ABS frame to protect the paint surface against rubbing.

The integrated door sills replace the plastic factory panels and snap into the same place. OE-fasteners lock firmly in place. Installation is a matter of minutes.

All Door Sills can be customized in a variety of ways. Logos, private label names and special designs can be incorporated into the basic door sill lay out. Since our standard base sill sizes fit several different vehicles, cross utilization of the same design with different embossing allows application to a number of vehicle models.
